

Guru Prasad Behera

Passionate Full Stack Web Developer and Data analytics Trainer seeking to leverage expertise in software development, data processing, and technical training to deliver impactful learning experiences. Skilled in Excel, SQL, Power BI, and modern web technologies, with a proven ability to mentor students, simplify complex concepts, and drive academic excellence and career readiness.

Experience

Sr. Trainer in Data Analytics in IBM Project

- Delivered comprehensive training sessions on Data Analytics tools and techniques, including Excel, SQL, Power BI, and Google Sheets, to diverse learner groups.
- Facilitated knowledge sessions on ETL concepts, data formats (CSV, JSON, XML), and reporting dashboards for beginner to intermediate learners.
- Conducted foundation-to-advanced sessions on Data Analytics, including data collection, validation, cleaning, and transformation techniques.
- Trained learners in statistical concepts and descriptive analytics to strengthen analytical thinking

Sr. Trainer in Web Designing *Anudip Foundation, Hyderabad Jun 2024*

- Trained corporate trainers on fundamental web technologies, including HTML, CSS, JavaScript, Bootstrap, WordPress, Figma, and Photoshop.
- Led interactive sessions and hands-on coding exercises to help trainers effectively teach web development concepts.
- Provided regular assessments and constructive feedback to ensure trainers could deliver high-quality content to corporate trainers.

Software Development Engineer

Nolan Edutech Pvt Ltd, Bangalore, Karnataka Oct 2023 - April 2024

- Led frontend and backend development using React.js, Node.js, and Express.js for seamless user experience.
- Developed an OTP service as a microservice with failover mechanisms, ensuring uninterrupted service availability.
- Integrated key features like OTP verification, automatic clearance of expired OTPs, and AI integration for enhanced functionality.

Projects

OTP Service - Micro Service

This is a Micro-Service. Whenever one service provider is down, it automatically switches to the next service provider. This project was collaboratively completed by a team of six members in 15 days.

Features :

- Sign-in/Sign-up using OTP Verification
- Expired OTPs are automatically cleared from the database.

Tech stack : React-Js, Nodejs, Express-Js, Mongo-DB, TypeScript

Areas of Responsibility:

- Worked on Frontend and Backend

Interest

Travelling, Swimming, Cycling
